

## **STAG - Observation 20 January 2010 - 8.30am**

- Pulled out of my drive at the end of 62 Church Street to find upwards of 65 cars queuing from Matlock Green, up Church Street and towards Starkholmes.
- I was parked stationary for 4 ½ mins. When movement commenced vehicles in front of me mounted the pavement, causing pedestrians to have to wait until the traffic had cleared.
- When it finally moved, having come out of my drive at 8.30am, by 8.36am I was still 10 cars from the junction at Matlock Green.
- Whilst waiting there 45 vehicles went up Church Street.
- When I finally turned left into the town the traffic was clear, quite simply because the cars coming down Chesterfield Road and from Tansley, were all turning up Church Street.
- I would like Cllr Jackson and any objectors to come and see this daily occurrence.
